DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

1. Claims 1-27 are still pending for examination.
2. Restriction to one of the following inventions is required under 35 U.S.C. § 121:
 - I. Claims 1-12 and 26-27 drawn to a system for providing a secure domain name service over a computer network, comprising: a server and a domain name database, classified in Class 709, subclass 226..
 - II. Claims 13-25 drawn a method for registering a secure domain name, comprising steps of: a) receiving a request, b) verifying ownership information, and c) registering the secure domain name, classified in Class 709, subclass 223.
3. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed of Invention I, claims 1-12 and 26-27, does not require the particular steps of the subcombination: a) receiving a request, b) verifying ownership information, and c) registering the secure domain name, and the subcombination Group 2, claims 13-25, does not require: a server and a domain name database.
4. Moreover, the searches for these two inventions would not be co-extensive because these groups would require different searches on PTO's classification class and subclass as following:

Art Unit: 2153

1) The Group I search (claims 1-12 and 26-27) would require use of search class 709, subclass 226 (which would not required for the group II).

2) The Group II search (claims 13-25) would require use of search class 709, subclass 223 (which would not required for the group I).

5. Applicant is reminded that the required for response to this requirement is **30 days, not one month.**
